

## INDEX

Volume II, February 1965 to November 1965

No. 1 (Feb. 1965), pp. 1-58  
No. 2 (May 1965), pp. 59-196  
No. 3 (Aug. 1965), pp. 197-298  
No. 4 (Nov. 1965), pp. 299-348

## AUTHOR INDEX

### ARTICLES

BAKER, CLYDE N., JR. *See* Perpich, William M.  
BROOKER, ELMER W., and IRELAND, HERBERT O. Earth pressures at rest related to stress history, 1  
CASAGRANDE, L., FIRING, P., SCHOOF, G., and TURCKE, E. W. JOHN. Settlement of mat foundation on thick stratum of sensitive clay, 299  
CRAWFORD, C. B. The resistance of soil structure to consolidation, 90  
DE JONG, E., and WARKENTIN, B. F. Shrinkage of soil samples with varying clay concentration, 16  
DELORY, F. A., GASS, A. A., and WONG, W. W. Measured pore pressures used for the control of two-stage construction of an embankment, 216  
FIRING, P. *See* Casagrande, L.  
GASS, A. A. *See* DeLory, F. A.  
HARDY, R. M. Identification and performance of swelling soil types, 141  
HORNER, J. M. *See* Kondner, R. L.  
INSLEY, ALAN E. A study of a large compacted clay embankment-fill failure, 274  
IRELAND, HERBERT O. *See* Brooker, Elmer W.  
KLOHN, EARLE J. The elastic properties of a dense glacial till deposit, 116  
KOHUSKA, A. *See* Rivard, P. J.  
KONDNER, R. L., and HORNER, J. M. Triaxial compression of a cohesive soil with effective octahedral normal stress control, 40  
LADANYI, B., LAROCHELLE, P., and TANGUAY, L. Some factors controlling the predictability of stress-strain behaviour in clay, 60  
LAROCHELLE, P. *See* Ladanyi, B.  
LO, K. Y., and STERMAC, A. G. Failure of an embankment founded on varved clay, 234  
LUKAS, ROBERT G. *See* Perpich, William M.  
MACFARLANE, I. C. The corrosiveness of muskeg waters: a review, 327  
PERPICH, WILLIAM M., LUKAS, ROBERT G., and BAKER, CLYDE N., JR. Desiccation of soil by trees related to foundation settlement, 23  
QUIGLEY, R. M. *See* Soderman, L. G.

RIVARD, P. J., and KOHUSKA, A. Shellmouth Dam test fill, 198  
SCHOOF, G. *See* Casagrande, L.  
SODERMAN, L. G., and QUIGLEY, R. M. Geotechnical properties of three Ontario clays, 167  
STERMAC, A. G. *See* Lo, K. Y.  
SUTCLIFFE, F. H. A till cofferdam in the St. Lawrence River, 261  
TANGUAY, L. *See* Ladanyi, B.  
TURCKE, E. W. JOHN. *See* Casagrande, L.  
WARKENTIN, B. F. *See* de Jong, E.  
WILLIAMS, G. P. Correlating freeze-up and break-up with weather conditions, 313  
WONG, W. W. *See* DeLory, F. A.

### DISCUSSION

BAZETT, D. J. Measured pore pressures used for the control of two-stage construction of an embankment (DeLory, Gass, and Wong) 228  
BOZOZUK, M. Failure of an oil storage tank founded on a sensitive marine clay (Brown and Paterson), 345  
BRADSHAW, T. J. *See* Conlon, R. J.  
BROOKER, E. W. Failure of an embankment founded on varved clay (Lo and Stermac), 258  
Identification and performance of swelling soil types (Hardy), 163  
BURN, K. N. Elastic properties of a dense glacial till deposit (Klohn), 341  
CONLON, R. J., and BRADSHAW, T. J. A till cofferdam in the St. Lawrence River (Sutcliffe), 271  
EDEN, W. J. Failure of an embankment founded on varved clay (Lo and Stermac), 259  
GOLDER, H. Q. Measured pore pressures used for the control of two-stage construction of an embankment (DeLory, Gass, and Wong), 227  
HANNA, T. H. The elastic properties of a dense glacial till deposit (Klohn), 129  
HARDY, R. M. A study of a large compacted clay embankment-fill failure (Insley), 287

HOLUBEC, I., and SCOTT, J. D. Some factors controlling the predictability of stress-strain behaviour of clay (Ladanyi, LaRochelle, and Tanguay), 87

HVORSLEV, M. J. Earth pressures at rest related to stress history (Brooker and Ireland), 337

LO, K. Y. The resistance of soil structure to consolidation (Crawford), 114

MATICH, M. A. J. A study of a large compacted clay embankment-fill failure (Insley), 294

MATYAS, E. L. Shellmouth Dam test fill (Rivard and Kohuska), 212

NEWLAND, P. L. Failure of an oil storage tank founded on a sensitive marine clay (Brown and Paterson), 343

NOBEL, C. A. Identification and performance of swelling soil types (Hardy), 161

OSLER, J. C. *See* Yong, R. N.

PERLOFF, W. H., Jr. Triaxial compression of a cohesive soil with effective octahedral normal stress control (Kondner and Horner), 338

PETERSON, R. The elastic properties of a dense glacial till deposit (Klohn), 140

Shellmouth Dam test fill (Rivard and Kohuska), 213

POLLOCK, D. H. Shellmouth Dam test fill (Rivard and Kohuska), 214

RAYMOND, G. P. Measured pore pressures used for the control of two-stage construction of an embankment (DeLory, Gass, and Wong), 232

The resistance of soil structure to consolidation (Crawford), 100  
(discussion by Raymond), 100

Failure of an oil storage tank founded on a sensitive marine clay (I), 205  
(discussion by Newland), 343  
(discussion by Bozozuk), 345

Settlement of mat foundation on thick stratum of sensitive clay (Casagrande, Firing, Schoop, and Turcke), 299

CLAY AND CLAY MINERALOGY (*see also* SENSITIVE CLAY)

Earth pressures at rest related to stress history (Brooker and Ireland), 1

Failure of an embankment founded on varved clay (Lo and Stermac), 234

Geotechnical properties of three Ontario clays (Soderman and Quigley), 167  
(discussion by Townsend), 190  
(discussion by Thomson), 194

Identification and performance of swelling soil types (Hardy), 141

The resistance of soil structure to consolidation (Crawford), 100

SCOTT, J. D. *See* Holubec, I.

SOWA, V. A. Some factors controlling the predictability of stress-strain behaviour of clay (Ladanyi, LaRochelle, and Tanguay), 84

THOMSON, S. Geotechnical properties of three Ontario clays (Soderman and Quigley), 194

Identification and performance of swelling soil types (Hardy), 154

THURBER, R. C. A study of a large compacted clay embankment-fill failure (Insley), 293

TOWNSEND, D. L. Failure of an embankment founded on varved clay (Lo and Stermac), 254

### SUBJECT INDEX OF ARTICLES AND DISCUSSION

#### APPARATUS

The resistance of soil structure to consolidation (Crawford), 90  
(discussion by Raymond), 100

#### BEARING CAPACITY

Failure of an oil storage tank founded on a sensitive marine clay (I), 205  
(discussion by Newland), 343  
(discussion by Bozozuk), 345

Settlement of mat foundation on thick stratum of sensitive clay (Casagrande, Firing, Schoop, and Turcke), 299

#### CLAY AND CLAY MINERALOGY (*see also* SENSITIVE CLAY)

Earth pressures at rest related to stress history (Brooker and Ireland), 1

Failure of an embankment founded on varved clay (Lo and Stermac), 234

Geotechnical properties of three Ontario clays (Soderman and Quigley), 167  
(discussion by Townsend), 190  
(discussion by Thomson), 194

Identification and performance of swelling soil types (Hardy), 141

#### Shrinkage of soil samples with varying clay concentration (de Jong and Warkentin), 16

Some factors controlling the predictability of stress-strain behaviour of clay (Ladanyi, LaRochelle, and Tanguay), 60  
(discussion by Sowa), 84  
(discussion by Holubec and Scott), 87

#### CONSOLIDATION

The resistance of soil structure to consolidation (Crawford), 90  
(discussion by Wilson), 98  
(discussion by Raymond), 100  
(discussion by Lo), 114

#### DAMS, SPILLWAYS, EMBANKMENTS

A study of a large compacted clay embankment-fill failure (Insley), 274

A till cofferdam in the St. Lawrence River (Sutcliffe), 261  
(discussion by Conlon and Bradshaw), 271

Shellmouth Dam test fill (Rivard and Kohuska), 198  
(discussion by Matyas), 212  
(discussion by Peterson), 213  
(discussion by Pollock), 214

**EARTH PRESSURE**

Earth pressures at rest related to stress history (Brooker and Ireland), 1  
(discussion by Hvorslev), 337

**ELASTIC PROPERTIES**

Some factors controlling the predictability of stress-strain behaviour of clay (Ladanyi, LaRochelle, and Tanguay), 60

The elastic properties of a dense glacial till deposit (Klohn), 116  
(discussion by Hanna), 129  
(discussion by Trow), 132  
(discussion by Peterson), 140  
(discussion by Burn), 341

**FIELD TESTS AND OBSERVATIONS**

Measured pore pressures used for the control of two-stage construction of an embankment (DeLory, Gass, and Wong), 216

Shellmouth Dam test fill (Rivard and Kohuska), 198

The elastic properties of a dense glacial till deposit (Klohn), 116  
(discussion by Trow), 132

**FAILURES**

A study of a large compacted clay embankment-fill failure (Insley), 274  
(discussion by Hardy), 287  
(discussion by Thurber), 293  
(discussion by Matich), 294

Failure of an embankment founded on varved clay (Lo and Stermac), 234  
(discussion by Eden), 259

**FOUNDATIONS**

Desiccation of soil by trees related to foundation settlement (Perpich, Lucas, and Baker), 23

Settlement of mat foundation on thick stratum of sensitive clay (Casagrande, Firing, Schoop, and Turcke), 299

**LABORATORY TESTS**

The resistance of soil structure to consolidation (Crawford), 90  
(discussion by Raymond), 100

Triaxial compression of a cohesive soil with effective octahedral normal stress control (Kondner and Horner), 40

**MUSKEG**

The corrosiveness of muskeg waters: a review (MacFarlane), 327

**PORE PRESSURE**

Measured pore pressures used for the control of two-stage construction of an embankment (DeLory, Gass, and Wong), 216  
(discussion by Yong and Osler), 229  
(discussion by Raymond), 232

**SENSITIVE CLAYS**

The resistance of soil structure to consolidation (Crawford), 90

**SETTLEMENT**

Settlement of mat foundation on thick stratum of sensitive clay (Casagrande, Firing, Schoop, and Turcke), 299

**SHEAR STRENGTH**

Failure of an embankment founded on varved clay (Lo and Stermac), 234  
(discussion by Townsend), 254

Identification and performance of swelling soil types (Hardy), 141

Some factors controlling the predictability of stress-strain behaviour of clay (Ladanyi, LaRochelle, and Tanguay), 60  
(discussion by Sowa), 84

Triaxial compression of a cohesive soil with effective octahedral normal stress control (Kondner and Horner), 40  
(discussion by Perloff), 338

**SOIL PROPERTIES**

Desiccation of soil by trees related to foundation settlement (Perpich, Lucas, and Baker), 23

Earth pressures at rest related to stress history (Brooker and Ireland), 1

Geotechnical properties of three Ontario clays (Soderman and Quigley), 167  
(discussion by Townsend), 190

Identification and performance of swelling soil types (Hardy), 141

Shrinkage of soil samples with varying clay concentration (de Jong and Warkentin), 16

The elastic properties of a dense glacial till deposit (Klohn), 116

The resistance of soil structure to consolidation (Crawford), 90  
(discussion by Raymond), 100

**STABILITY OF SLOPES**

A study of a large compacted clay embankment-fill failure (Insley), 274  
(discussion by Hardy), 287

Failure of an embankment founded on varved clay (Lo and Stermac), 234  
(discussion by Brooker), 258

Measured pore pressures used for the control of two-stage construction of an embankment (DeLory, Gass, and Wong), 216  
(discussion by Golder), 227  
(discussion by Bazett), 228

Shellmouth Dam test fill (Rivard and Kohuska), 198

**STRESS DISTRIBUTION**

A study of a large compacted clay embankment-fill failure (Insley), 274  
(discussion by Matich), 294

Earth pressures at rest related to stress history (Brooker and Ireland), 1

Some factors controlling the predictability of stress-strain behaviour of clay (Ladanyi, LaRochelle, and Tanguay), 60

The elastic properties of a dense glacial till deposit (Klohn), 116  
(discussion by Hanna), 129

**SWELLING SOILS**

Desiccation of soil by trees related to foundation settlement (Perpich, Lucas, and Baker), 23

Identification and performance of swelling soil types (Hardy), 141  
(discussion by Thomson), 154  
(discussion by Yong), 157  
(discussion by Noble), 161  
(discussion by Brooker), 163

**TEMPERATURE AND THERMAL PROPERTIES**

Correlating freeze-up and break-up with weather conditions (Williams), 313

**THEORETICAL CALCULATIONS**

Correlating freeze-up and break-up with weather conditions (Williams), 313

Triaxial compression of a cohesive soil with effective octahedral normal stress control (Kondner and Horner), 40

**VOLUME CHANGES IN SOILS**

Desiccation of soil by trees related to foundation settlement (Perpich, Lucas, and Baker), 23

Shrinkage of soil samples with varying clay concentration (de Jong and Warkentin), 16
